200 CHAPTER 5 Mathematics of Finance A deposit of dollars today at a rate of interest  $P$  for years produces interest of  $t r I = Prt$ . The interest, added to the original principal  $P$ , gives  $P + Prt = P(1 + rt)$ . This amount is

called the future value of P dollars at an interest rate r for time t in years. When loans are involved, the future value is often called the maturity value of the loan.
