When you are coming up with a database design, you must take these rules into account for the system you are modeling. No two systems will be exactly the same. Relations or Tables MySQL is a relational database management system (RDBMS) that is, it supports databases that consist of a set of relations.

Remember, the response or information you obtain is only as good as the question. If you don't get the type of information you want, it is probably because you didn't ask the right question! Wording the questions to obtain the intended information and to be understood by all respondents is a challenging task. When you
